

QUARTZFORMS

Care & Maintenance

Its hard, nonporous surface makes **QUARTZFORMS** easy to clean. In most cases, soap and water or a mild detergent is all that is required to maintain its luster. If necessary, a **non-abrasive Liquid Gel** cleanser **without Bleach** can be used along with a non-scratch or delicate scrub pad such as **blue Scotch-Brite sponge**. Adhered materials like food, gum, nail polish, or dried paint can be scraped away with a plastic putty knife; any marks left by the blade can be removed with Soft Scrub Liquid Gel and a blue Scotch-Brite pad. Thoroughly rinse the surface with clean water to remove residue.

While **QUARTZFORMS** does not require sealants or waxes to maintain its luster, occasional polishing with a **Liquid Gel** cleanser **without Bleach** will keep the quartz surfacing looking its best.

QUARTZFORMS prides itself in providing our customers a virtually care-free surface, but as with any product, excessive abuse can harm its finish. With a small amount of care, your **QUARTZFORMS** surface will look as great as the day you bought it for years to come.
